

OUR VISION

We understand that the homes we build today determine to a great extent the world we live in tomorrow

INNOVATIVE DESIGN

Our homes utilize the most pragmatic building science with a brand of craftsmanship that seeks to harmonize the home's performance seamlessly with its aesthetics.

ABOUT US

Cardinal Point Construction builds beautiful and durable homes appropriate to the climate crisis. Our goal is to prove to the world that the most comfortable, pleasing homes are also the healthiest and most energy efficient. We deliberately build homes that dance with the sun, engage our senses with nature, and endure enough to be valued for generations. By building within a Permaculture context, we create the potential for a food forest around our homes.
